PROFILE SUMMARY

- **Summary**: Full-Stack Developer with 2 years of experience in building web and mobile applications using MERN stack and React Native. Skilled in frontend/backend development, Redux state management, Socket.IO for real-time applications, and deployment.

EDUCATION

- **Adarsh Sr. Sec. School, Kadarpur (Gurugram)** 2020
  12th (Board of School Education Haryana, Bhiwani)
- **Jai Bharti High School, Naugangpur (Gurugram)** 2018
  10th (Board of School Education Haryana, Bhiwani)

EXPERIENCE

- **PropFuture AI Technologies Pvt. Ltd.(PropertyDekho247)** Gurugram, India
  MERN Stack *Oct 2024 – Present*
  - **Full-Stack Ownership**: Joined as first developer and delivered 85% of platform functionality — designed frontend & backend architecture, folder/API structure, deployment setup, and global error-handling strategy.
  - **Website Development**: Built PropertyDekho247.com from scratch with Indian, NRI, Admin, and Agent logins; residential & commercial property posting; search filters; and role-based dashboards. Created workflows for Buyers, NRIs, Channel Partners, Tenants, Owners, Admins, and Agents with property activation flow.
  - **Role-Based Access Control (RBAC)**: Designed a multi-role permission system:
    * **Admin**: Manage Agents, verify properties, block/unblock users.
    * **Agent**: Handle assigned properties, inquiries, visits, and updates.
    * **Owner**: Manage Admin/Agent access, listings, and property control.
    Implemented complete frontend/backend logic for role management, permissions, and verification.
  - **Backend Engineering**: Developed secure APIs (Node.js, Express, MongoDB, JWT) with OTP login via Pincale. Features:
    * Property bidding & visit scheduling.
    * Auto post-expiry after 3 months with recall process.
    * Rent-In/Rent-Out workflows.
    * Email templates for property, visit, bid, and expiry notifications.
    Added "Need Any Help" module, Cron jobs, Agenda, Rate Limiting, and API Throttling.
  - **Frontend Development**: Responsive UI with React.js & Redux; reusable components; API alert handling; dashboards for all roles; expiry alerts; help requests; visit & bid management.
  - **Team Leadership**: Worked solo for 3 months, then mentored team on workflows, coding standards, and GitHub processes.
  - **Tech Stack**: MERN Stack, Redux, JWT Auth, Pincale OTP, SMS Retriever API, Cron, Agenda, Rate Limiting, REST APIs.

PROJECTS

- **Play Ludo – React Native Mobile Game (Live on Play Store)**: A full-featured Ludo game built using React Native with online, offline, and CPU gameplay modes.
  - Published on Google Play Store – over-the-air updates and production release management.
  - Supports Play vs Computer (CPU), offline 2–4 player multiplayer, and real-time online multiplayer using Socket.IO.
  - Integrated animations, Redux-based state management, and optimized reusable components.
  - Designed with responsive UI and smooth gameplay across Android devices.

  Play Store: https://play.google.com/store/apps/details?id=com.webpagewalla.ludogame

- **My Store - Ecommerce Platform** : MERN e-commerce app with product/order management, search/filter, and role-based dashboards.
  - Separate user/admin CRUD for products, orders, and users.
  - Cloudinary uploads, OTP login, email notifications.
- **Safe Tracker – Live Location Tracking App (In Progress)**: Building Safe Tracker, a real-time location tracking app as an ongoing project.

PROGRAMMING SKILLS

- **Languages**: JavaScript, Kotlin

  Technologies & Tools: MERN Stack (MongoDB, Express.js, React.js, Node.js), Typescript, React Native, Redux, Redux Toolkit (RTK Query), Git/GitHub, Docker, Socket.io, Agenda ,Firebase ,Aws ,CI/CD pipelines , Google AdMob
